DETAILED ACTION

Applicant's election with traverse of Group I, and the species set forth at page 32, Table I, Example I-1 in the reply filed on 5/10/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The requirement is still deemed proper and is therefore made FINAL.

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 8 and 9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Voeks, US Patent No. 3,367,926.

a. Voeks discloses crystallizable thermoplastic polymers having 0.005 to 1.0 % per weight of the polymer, of a nucleating agent therein, wherein said nucleating agent has a center that is covalently bonded to a moiety capable of forming intermolecular hydrogen bonds and another moiety attached thereto that is compatible with said crystallizable thermoplastic polymers. See col.1, line 10 through col. 2, line 58 and col. 4, line 40 through col. 9, line 58.

3. Claims 2-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
